How will you use it?

SanDisk offers you the flexibility to use your memory card in digital cameras, handheld PCs, digital music players, laptops, smart phones, digital video recorders and more. Our high-performance MultiMediaCard, CompactFlash[®] and SmartMedia[™] memory

cards offer compatibility with most digital cameras. What's more, with CompactFlash, you can take up to 192MB of memories on one card. And with SanDisk's FlashPath[™] adapter and ImageMate[™] reader you can quickly and easily transfer data from your memory card to your computer. With the best-selling memory solutions from SanDisk, there are so many possibilities. Visit your local reseller or see us at www.sandisk.com/pcphoto/.
