

SUN STOREDGE™ L11000 TAPE LIBRARY

HIGH-END, ENTERPRISE-LEVEL STORAGE MANAGEMENT SOLUTION.

Designed for backup of enterprise networks and servers, the Sun StorEdge L11000 system is a heavy-duty library for enterprise applications in mission-critical environments. At the high-end of Sun's tape library line, the Sun StorEdge L11000 enables customers to backup databases as large as 2.3 TB overnight. It supports between four and sixteen hot-pluggable DLT7000 tape drives and 338 cartridges, delivers superior performance of 288 GB/hour, and offers outstanding native capacity of 11.8 TB. Combine all that with Sun Enterprise™ servers and Sun software, like Sun StorEdge Enterprise NetBackup, and you have a complete backup solution of superior performance and reliability.

HIGHLIGHTS

- | | | | |
|---|--|---|---|
| <ul style="list-style-type: none">• Up to sixteen highly reliable DLT7000 tape drives and 338 cartridges.• Robotic handling system with operator accessible load port that can handle 12 cartridges. | <ul style="list-style-type: none">• Hot-pluggable DLT7000 drives.• Hot-swappable and redundant power supplies and fans. | <ul style="list-style-type: none">• GUI interface panel allows for local administration and configurations.• Barcode reader ensures accurate identification of individual tape cartridges. | <ul style="list-style-type: none">• Standard PCI Bus Architecture.• Sun StorEdge LibMON™ software enables remote administration via an Internet browser for remote configuration, monitoring, and diagnostics. |
